

Grinder Manholes

Building upon our tested fiberglass flow measurement manholes, Openchannelflow has developed complete, packaged fiberglass Grinder Manholes for a variety of in-line sewage grinding applications.

Openchannelflow Grinder Manholes are low maintenance, quick to install, single-piece, water-tight and corrosion resistant units built with a ruggedness to withstand the most aggressive of environments.

Openness – Openchannelflow can accommodate open channel grinders from JWC® (3005 series Muffin Monsters®), Franklin Miller® (TM-8500 series Taskmasters®), MonoFlo® (Series 'A' Munchers®), and others. Our ability to integrate just about any open channel grinder allows your operation to remain flexible – not locking you into one grinder manufacturer. You supply the grinder, we supply the knowhow. Dig It! Drop It! Done!

While most Grinder manholes utilize Domed Fiberglass Tops to maximize access, Openchannelflow also offers manholes suitable for pedestrian foot-traffic and H-20 vehicular traffic.

In addition, Openchannelflow Grinder Manholes are available in a range of diameters: 48-inch [1.22 m], 60-inch [1.52 m], 72-inch [1.83 m], and 96-inch [2.44 m], to accommodate single grinder, dual grinder, and grinder / bypass arrangements.

Solutions For:

- JWC 3005 Muffin Monsters®
- Franklin Miller Taskmasters®
- MonoFlo Series 'A' Munchers®
- Grundfos (formerly YCC) Sewer Chewer®

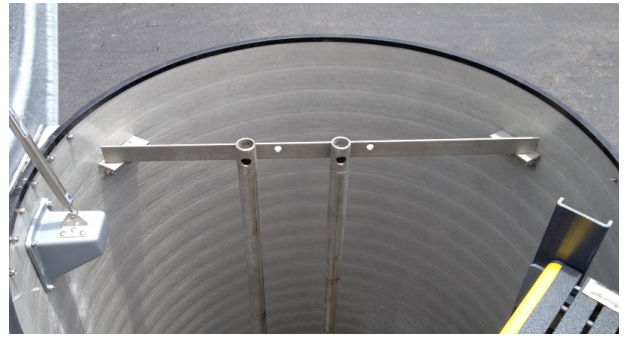

Flumes - Shelters - Fiberglass Manholes - Enclosures - Weirs - Gauges

Standard Equipment:

- OSHA-complaint FRP ladder with non-slip rungs
- Integral grinder channel with non-slip surround
- Recessed grinder channel grating
- Stainless steel cable hook
- Thru-wall coupling (for power / control cabling)
- Inlet / outlet stubs or flanges for quick connection

Benefits

For owner, consultants, and contractors, Openchannelflow Grinder Manholes provide:

- Single source responsibility - no finger pointing among subs
- Confidence that the grinder / rails are installed correctly
 - No surprises in the field for owners
 - No expensive call-backs for contractors
- Integrate the open channel grinder that you want
 - Openchannelflow has solutions for all the major grinder manufacturers
- Virtually no maintenance or repairs
- Minimal installation / plant downtime
- Industry leading (5) year FiberLock equipment warranty - install it and forget it!

Dig It! Drop It! Done!

From the outset, Grinder Manholes from Openchannelflow have been designed to be extremely easy to install.

Requiring little more than a concrete pad to mount to, at a prepared site, installation can take a little as a morning, making Grinder Manholes great for holiday / plant shut-down installations.

Customization

Openchannelflow offers a wide range of options to help you customize not only the manhole, but also the grinder installation:

Manhole

- GP and XP lighting
- GP and XP exhaust fans
- Intermediate platforms
- Two-piece construction

Grinder

- Factory-installed grinder rails
- Bypass channels
- Overflow pipes
- Static back-up bar screens

End Connections

- Pipe stubs
- Fixed & Van Stone flanges
- Caulking collars
